## Differentiators

- Safety is our first priority. Our crews must complete our own intensive safety school along with ongoing inspections and certifications. We have also partnered with a national insurance provider to ensure external safety oversight. Our current EMR rating is .81
- We see each project as an opportunity to develop a lasting relationship, not just a transaction. This approach has allowed Mid America Metals to serve many of the same customers since we first opened our doors. If for any reason your expectations are not met, we will work on the job until you are 100% satisfied, issue a credit for the work or give you your money back; that is our **Satisfaction Guarantee**.
